

LAUFER Choose Baysek EL-150 Die Cutter

Laufer GmbH und Co. KG
Headquarters in Hövelhof, Germany

Founded in 1977 by Wolfgang Laufer, LAUFER GmbH and Co. KG remains a family business currently administered by Managing Director, Daniel Laufer since 1998. With 3 locations in East Westphalia, LAUFER employs a team of 150.

Known for its wide variety of packaging products and timely solutions, it is no coincidence that Laufer is another name for “a messenger” or a “fast runner.” LAUFER prides itself in optimization from idea to market for each of their commercial and industrial customers, both domestically and abroad, while processing over 30 million square meters of corrugated board per year.

To add to its focus on delivery of high quality finished work in an efficient manner, LAUFER invested in a new Baysek EL-150 die cutter to enhance flexibility and bridge the gap between their current traditional flatbed die cutters and rotary die cutters. The Baysek die cutting method automatically shear cuts,

The One Operator, Nick/Tag-Free, Multiple Out Baysek EL-150 die cutter is ideal for large format/large run die cutting as well as small, medium, and large runs of smaller items requiring automatically fully stripped waste.

fully pneumatically strips waste, accurately counts, and neatly stacks nick/tag-free large one-outs to smaller multiple-out finished units with one operator via an easy to operate computerized touch screen.

The EL-150 is a complement to LAUFER's focus on environmentally friendly packaging mediums with more than 80% deriving from recycled waste paper. Recycled sheets are easily handled with high quality converting results while waste is pneumatically extracted and directed to eco-friendly recycling.
